### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of claims 1, 4-17 and 19 are the limitations found in claim 1, 11 and 17 for a piston and cylinder dampener adjacent to the frame and the roll member to control a movement of the roll member. The prior art fails to teach piston type dampening members combined with the rest of the structure of claims 1, 11 and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Acker (U.S. Patent No. 5,742,859) teaches a self leveling camera support. Allred (U.S. Patent No. 4,752,791), Embra (U.S. Patent No. 4,621,785) and Gottschalk et al. (U.S. Patent No. 4,158,490) all disclose camera support structures where a piston is used to aid in dampening unwanted movements.
